## ABOUT SHRI VAISHNAV TRUST

Year 1884 is a landmark year as the foundation stone was laid 138 years ago for Shri Vaishnav Group of Institutions by compassionate Cloth Merchants of Vaishnav cult of Indore, which was later reconstituted as Shri Vaishnav Sahayak Kapada Market Committee in the year 1934. Shri Vaishnav Vidyapeeth Trust believes in taking the Nation forward by improving the quality of life of its citizens by continuously working in the sphere of education, health and environment. It has been established to promote education and research in various disciplines through academic Institutions for the benefit of all sections of the society, but not with the motive of profit. Under the guidance of Shri Vaishnav Sahayak Kapada Market Committee, Shri Vaishnav Shekshanik Avam Parmarthik Nyas was established in the year 1981. Since then, Nyas has been working relentlessly for the upliftment of the society and country as a whole by providing better technical and professional education, health facilities, schools and other services. Shri Vaishnav Sahayak Kapada Market Committee is running University, Colleges, Schools and Institutes of Professional Studies and Research and also rendering social service.

## ABOUT THE CONGRESS

Meeting sustainable development goals requires harnessing and maximizing the potential of technological innovation in such a way that it utilizes natural resources optimally and fosters economic and social development. Such interventions drastically reduce environmental and ecological risks and create a sustainable product. Sustainable development is intended to ensure the availability of basic human needs like clean air, water and hygiene. Rapid industrialization has resulted in the exploitation of the natural resources of the earth and sustainable development aims not only to reduce the stress on natural resources but also to find ways to replenish them. Though technological innovations deals with energy efficiency, reduction in pollution, use of renewable sources, it should also be economically sustainable too. One of the biggest challenge is to turn sustainable technology into reality. Innovations and technological interventions need to be focused to preserve the natural resources of the earth to make the planet sustainable for a long term. The present congress will discuss the emerging challenges in the area of sustainability.
